

ABSTRAK

Nama : Muhammad Yogi Mustofa
Program Studi : Informatika
Judul : Rancang Bangun Aplikasi *E-learning* Berbasis *Web* di Nursi
Research Center UIN Syarif Hidayatullah
Dosen Pembimbing : Muhammad Ramli, S.T

Selama pandemi *Covid-19* saat ini, pembelajaran tatap muka tidak mungkin bisa dilakukan dikelas. Oleh karena itu, institusi yang berada di Indonesia termasuk Nursi Research Center membangun sistem pembelajaran jarak jauh. Metode pembelajaran yang akan digunakan di Nursi Research Center ini menggunakan sistem *E-learning*. Proses pengembangan sistem *e-learning* menggunakan model *prototyping* dan *platform* WordPress sebagai *engine* dasarnya. Sistem *e-learning* yang dibangun memiliki fitur seperti *list courses*, *list* pengajar, *list* murid, *video conference* (*zoom* atau *Google meet*), daftar hadir, *complete course*, tugas, ujian, *quiz*, sertifikat *auto generate* dan *event*. Semua fitur ini telah diimplementasikan pada *prototyping e-learning* NRC. *E-learning* ini menjadi alternatif pembelajaran jarak jauh di Nursi Research Center yang akan dilakukan selama pandemi *covid-19* dan masa kenormalan baru.

Kata kunci: belajar online, sistem *e-learning*, pembelajaran jarak jauh

ABSTRACT

During the current Covid-19 pandemic, face-to-face learning is impossible in the classroom. Therefore, institutions in Indonesia including Nursi Research Center build distance learning systems. The learning method that will be used in Nursi Research Center uses E-learning system. The e-learning system development process uses prototyping models and The WordPress platform as its basic engine. The built e-learning system has features such as list courses, teacher list, student list, video conference (zoom or Google meet), attendance list, complete course, assignments, exams, quiz, auto generate certificate and event. All of these features have been implemented in prototyping NRC e-learning. This e-learning is an alternative distance learning at Nursi Research Center that will be done during the covid-19 pandemic and new normality.

Keywords: *online learning, e-learning system, distance learning.*
